(b) This resulted in how many total nights** paid lodging:	_____	_____	Method _____ Explain _____
<i>**Consider multiple nights, double occupancy, etc.</i>			_____
	<i>Nights</i>	<i>Nights</i>	

- ★ **Direct Count** – e.g., paid admissions, head count, chair or vehicle count, figures collected from a hotel/restaurant/tour guide.
- ★ **Indirect Count** – e.g., raffle tickets sold, redeemed coupons, brochures handed out, police requirements for crowd control, visual estimate.
- ★ **Representative Survey** – Highly structured data collection based on random sample survey that includes a margin of error and confidence level which allows the results to be reliably projected over all attendees.
- ★ **Informal Survey** – Unstructured survey with results that cannot be reliably projected over all attendees. For example, information is taken only from volunteer participants, or it's only offered at one time/place rather than throughout the event.
- ★ **Structured Estimate** – Figure is based on computing known information about an event or location such as the maximum legal occupancy (one person per 3 square feet).
- ★ **Other** – Please describe.

A REPORT IS DUE UPON COMPLETION OF YOUR EVENT. THANK YOU!
